

Document 1: Initial Design

Purpose

BoilerFoods is at the forefront of the organic movement, championing the cause for healthier lives and a healthier planet. Our platform is more than just a marketplace; it's a commitment to transforming how people think about and consume food. By bridging the gap between organic farmers and conscious consumers, BoilerFoods ensures that every bite supports sustainable agriculture and promotes wellness.

Intended Users

BoilerFoods serves a diverse community of users, including:

- **Health Enthusiasts** who prioritize nutrition and organic ingredients in their diets.
- **Eco-Conscious Consumers** looking to reduce their carbon footprint through sustainable eating habits.
- **Busy Professionals and Families** seeking convenient access to healthy food options.
- **Organic Farmers and Producers** aiming to reach a wider audience with their sustainable products.

Key Features

- **Extensive Organic Catalog:** Explore a vast selection of certified organic products, from fresh produce to pantry staples.
- **Eco-Friendly Packaging:** Receive your orders in 100% biodegradable or recyclable packaging, in line with our sustainability ethos.
- **Sign Up for the Newsletter:** Gain access to exclusive recipes that turn your organic ingredients into gourmet meals, complete with nutritional information.
- **A home page** that introduces BoilerFoods with a focus on natural and healthy food, alongside navigation options for products, about us, and contact information.
- **A products page** showcasing a variety of organic items available for purchase, with an "Add to Cart" option for each product.
- **A detailed single item page** for individual products, providing a description, price, and the option to select quantity before adding to the cart.
- **A user creation and post page** allowing users to write and submit reviews for products they've purchased.
- **A login or sign-up page** for new users to create accounts or existing users to log in, highlighting a rewards program.

User Experience Example

Initially, a user will access our boiler foods website, landing on the homepage. From there, they will proceed to the products page, where they can select items of their choice to add to their cart. Following this, by clicking on the cart button, they will be directed to the checkout page, enabling them to finalize and place their food order.
